Using the Chromecast screen

All rooms are equipped with a TV screen with Chromecast, allowing you to connect your electronic media to the big screen!

Activating the Chromecast :

1. Turn on the TV with the remote control and press the button 
2. Scan the QR code with your mobile or connect to the network indicated with the password provided
3. Select your content from your device, it will then be streamed to the screen

Good to know!

Our beloved **Netflix** will unfortunately not work with the Chromecast for reasons imposed by the platform itself... Sorry about that!

If you notice a lack of sound, check that the sound source is the TV speaker and not the headphones. To do this, activate the volume and move the slider to the right or left, paying attention to the type of volume bar displayed on the screen.

We are of course at your disposal at any time if needed!
